H1502RP

Multi-network Smart LTE module

Supports Wi-Fi & BT

H1502RP is a multi-network Smart LTE Cat 4 module based on MediaTek's Octa-core (Dual-core ARM Cortex-A75 + Six-core ARM Cortex-A55) processor launched by Sunning Smart, equipped with Android 13 operating system. Its powerful performance, neon engine processing, 2D/3D graphics acceleration processing capabilities, fully meet the needs of customers for high-speed and multimedia functions in industrial and consumer applications.

H1502RP supports full coverage of all network systems, WI-FI 802.11a/b/g/n/ac, and BT5.0 near-field wireless communication. In addition, the H1502RP also has audio and video input and output interfaces and rich GPIO interfaces. It also supports a variety of audio and video codecs. The home screen supports HD+1280*800 at most. At the same time, H1502RP supports GPS/GLONASS/BeiDou/Galileo positioning systems, making its positioning function fast and accurate.

H1502RP is a patch module with a total of 274 pins, including 146 LCC pins and 128 LGA pins. The size is only 40.5mm × 40.5mm × 2.8mm, which can be embedded in various M2M product applications through pads, making it widely used in smart cash registers, smart POS, tax control machines, security monitoring, vehicle equipment, and high-end information Collection equipment, smart robots, smart homes, smart hardware, industrial smart handheld devices, drones, high-end police or law enforcement equipment, smart intercom devices, smart wearables, vending machines, logistics cabinets and other equipment are used in different industries.
